**DANIEL BZURA**  
**ANGIE WINTON**

April 7, 2021

Your neighborhood has been selected for improvements to your local streets in conjunction with the City of Taylor's Mayor (Mr. Rick Sollars) "**Good to Great**" public improvement program.

The City of Taylor's Concrete Pavement Repair Contractor (Jasso Brothers Cement along with Al's Asphalt Paving Company) will be completing pavement replacement work in your neighborhood.

The proposed pavement improvements are scheduled to begin early in the Spring of 2021 and progress throughout the City of Taylor as deemed essential throughout the construction season. Please note that all construction work is always dependent on the weather.

#### Pavement Replacement Process:

All concrete replacement will be performed in a half-width method. Only one side of the road will be closed at any time to attempt to maintain residential traffic and emergency vehicle access. Typically, each repair location will require +/- 10 Days from start to completion. The +/- Day process would start again if there was an adjacent concrete panel that was also included in a repair location.

- +/- 2 Days for pavement removal, preparing location for new concrete, and road base conditioning if deemed required
- +/- 1 Day for new concrete placement and installing concrete curing compound
- +/- 7 Days for new concrete to cure to a minimum concrete strength to support vehicle loads

Please note that scheduled trash, recycle, and yard waste pick-ups will not be affected by the pavement improvements. However, the pick-ups may be completed earlier in the morning during construction in an effort to expedite the pavement replacement process. All residents should place their bins near the curb line on their schedule pick up day prior to 7:00am. Residents are also encouraged to label their trash/recycle bins with their corresponding address to avoid their bins accidentally being misplaced.

Mail services will not be affected by the pavement replacement improvements.

Please note that the pavement replacement improvement is a short term inconvenience to all City of Taylor residents and visitors, but is a necessary inconvenience in order to improve our public streets for everyone's use.

The main contact for all questions regarding the Concrete Pavement Replacement work is Jesse Kyle (586. 531.2131)

Sincerely,

Christopher Gibbs, M.B.A., P.E.  
City of Taylor, City Engineer
